Salts, which are comprised of various small or large molecular weight compounds, are one of the largest classes of organic and inorganic compounds. Inorganic salts include inorganic cations and anions, such as sodium, potassium, calcium, barium, magnesium, and the like, as well as inorganic acids, such as nitric, phosphoric, and hydrochloric acids. Organic salts include anions and cations, such as ammonium, tetraalkylammonium, di(lower alkyl)ammonium, and quaternary ammonium, as well as organic acids, such as acetic, benzoic, citric, formic, glutamic, lactic, oxalic, tartaric, and the like. In the past, different salts and salts forming compounds have been used as reagents, catalysts, and buffers in chemical and biochemical processes. In addition, salts and salts forming compounds have been used as medicines and in the treatment of ailments. For example, certain inorganic salts, including alkali metal bicarbonates, alkali metal carbonates, alkali metal phosphates, and the like, have been used as buffer solutions in the treatment of ailments. In another example, alkali metal sulfates, alkali metal phosphates, and alkali metal carbonates have been used as reagents and catalysts in biochemical processes. In yet another example, salts of metals, such as silver, copper, lead, zinc, aluminum, and the like, have been used as medicines. Salts are also used as anti-freeze compositions. For example, sodium chloride is used in windshield and window de-icer formulations. Although numerous salts and salts forming compounds have been used in chemical and biochemical processes, medicines, and anti-freeze compositions, there is still a need for other salts and salts forming compounds. SEARCH: In the past few years, we have seen 3-phase, 4-phase and 5-phase induction motors with a reduction in the price of these induction motors that are suitable for small scale facilities. We as a provider of HVAC maintenance and repair to small scale facilities in Montreal and Montreal Quebec call upon you to install one of these motors for use in your smaller scale facility. Product features: Small scale facility Relatively low weight 4-phase motor 5-phase motor Installation is simple, you need no special skills Our company offers 82157476af
